High Pride
Higher Performance
Highest Quality

JEC Ltd. specialise in the field of sanitary pumps.

JEC was established in 1990 and started producing sanitary pumps utilising precision cast and pressed parts for the first time in Korea. Since then JEC has been successfully supplying to the process industries centrifugal, rotary, twin screw and self-priming pumps, as well as blenders. JEC pumps are now renowned for reliability both for general duties and special application. JEC's success is built upon high quality manufacture and customer satisfaction. Our policy is one of long term vendor partnerships.

Good relations with our customers are prerequisite our growth.

JEC considers exchanging ideas their customers of the highest importance.

It is our belief JEC customers support fully meets customer expectations and contributes towards their prosperity.

We are always striving to make every effort to start new initiatives.

The JEC philosophy is one of continuous improvement and keeping promises.

Our pride is created by high quality!

In all sectors of the beverage and food processing industries, the JEC JP Series pumps have proven successful by absolute reliability, low energy consumption, perfect CIP clean ability and low noise level. special feature of the JEC pump is high efficiency which gives low energy consumption. the basis for this is the unique spiral-shaped casing and the double curved impeller. the design reduces friction and turbulence and gives a better suction capacity (low NPSH) at the same time as the pumped product is handled very gently.

JP series Centrifugal Pumps

JEC - Always a Step Ahead

- The JEC JP Series pumps are ideal for hygienic application in field of dairy, food, beverage, pharmaceutical and other industries where acid-proof steel is resistant to the liquids to be pumped.
- The pumps come from long-term developed activities and experiences in the production of pumps combined with detailed knowledge of products and their processing
- All parts in contact with the liquid-casing, impeller and shaft-are made of 316L stainless steel.
- Designed for either CIP or manual cleaning
- Only one size of shaft seal is required for all JP series (except 205 series), so keeping a few parts in stock is simple and inexpensive
- Further a single seal can be easily changed to double seal in minutes with just a few extra parts.
- Packing of EPDM rubber and others are available as required.
- The pumps can deliver capacities up to 100m³/hr and head up to 80m.

MECHANICAL SEAL

Standard Mechanical Seal

- **Face materials**
SiC/Carbon(STD), Optional - SiC/SiC

Flushed Mechanical Seal

- **Elastomers**
EPDM(STD), Optional - FPM, Perfluoro etc.

PERFORMANCE COURVES

Performance data refer to water at 20°C, Permissible tolerance $\pm 5\%$

*“The higher the precision
the longer the span of product life”*

Our pride is created
by high quality!
